EUROPEAN BRAND WITH GLOBAL SIGNIFICANCE

With 70 years of tradition and over 10,000 employees Gorenje is one of the largest home appliances manufacturers in the Southeast Europe. Since 2018 Gorenje has been part of the Hisense corporation, a global technology leader. Along with Hisense and the premium brand Asko, Gorenje is one of the Corporation's three global brands.

Gorenje, **high-quality** and **intelligently designed** home appliances are smart and efficient, with **high performance** and **low energy consumption**. They deliver the **best results** every time as well as they enable **simplicity in experience**. Gorenje is successfully fulfilling the **vision of a more connected life**, simplified by a series of connected devices designed with advanced digital solutions and services.

Gorenje's **unique specialty** are **thoughtfully designed product lines**, made in cooperation with **famous designers** such as **Ora-ïto**, as well as **lifestyle collections** to suit different tastes from retro, classic to modern. Gorenje's reputation is recognized by numerous prestigious international awards including the latest Red Dot Design Award, received recently for the new **Gorenje Simplicity** induction hob.

WELCOME TO YOUR LIFE SIMPLIFIED

We believe in a simpler life. In spending time with our loved ones. Revelling in small moments and big milestones.

Everything we do, we do with one goal. To simplify your life. We take inspiration from life and always innovate with you, our simplicity enthusiasts, in mind. We know, what you expect is simplification, not complexity. That is why every innovation, new technology or service we provide has to have a simplifying purpose.

When you choose a Gorenje appliance, you choose truly effortless, reliable and efficient technology built around your needs. You choose to live healthy, to always expect superior results, enjoy flexibility and guidance. You choose to simplify your chores, from the smallest everyday moments to life's biggest events.

We would like to inspire you to embrace simplicity. To make your home life simpler. Simplifying everything around daily tasks you need to do, so that you have more time for everything you love to do.

Chest freezers

A white front-loading washing machine is shown on the left side of the image. The machine has a black circular door and a digital display panel showing '2:19'. Above the machine, there is a shelf with various laundry items, including a white container and some bottles. The background is a light-colored wall. A large teal overlay covers the right half of the image, containing the main text.

'I WONDER HOW MY MOM DID IT' MOMENTS

Deep washing and gentle drying with the power of ions and steam for de-wrinkling even delicate shirts.

No more bugging mom.

**ALWAYS
FRESH AND
TREATED
WITH CARE**

WaveActive WASHING MACHINES

Gorenje **WaveActive** washing machines use the unique **IonTech** technology to tackle even the toughest stains with the gentlest care. Using the power of the natural ionisation process ensures best washing results without high temperatures, additional chemicals, softeners or other irritants, it prevents the deposit of lime scale, which prolongs the machine's life cycle. With adding convenient **SteamTech** technology our machines helps save you time, money and unnecessary effort.

So you can enjoy in what's really important.

GENTLE CARE FOR THE MOST SENSITIVE GARMENTS

WaveActive

PERFECT
LAUNDRY
WELLNESS

What if you could have virtually wrinkle-free laundry — just out of the washing machine? Now you can, thanks to the unique wave-shaped drum pattern and 3D ribs, developed to soften fabric fibres for impeccably smooth laundry. **WaveActive** drum technology delivers perfectly clean clothes, while ensuring extra care for your silk, wool and similar sensitive garments.

Drum illumination

No more missed socks
in the drum.

Lights the interior of the drum when the door opens at the end of the washing cycle.

**ABSOLUTE
MUST HAVE**

ODOURLESS, SMOOTH RESULTS WITHOUT A SOFTENER

SteamTech

When you really want to ensure that your laundry is bacteria- and odour-free, there is no better way than engaging our ingenious end-of cycle steam treatment. Not only will you ensure that your laundry is safe if you or your loved ones have allergies, but your clothes will also be less creased and delightfully soft even without the use of softener.

5 WAYS WASHING WITH STEAM WILL MAKE YOUR LIFE SIMPLER

- 1. Less ironing.**
They will minimize wrinkles and ensure your clothes are smooth even without ironing. Just don't forget to remove them from the washer as soon as the cycle is finished.
- 2. Eliminate odours.**
Washing machines with steam programmes can remove unpleasant odours more efficiently than regular washing machines, while still being extremely gentle to the fabric.
- 3. Save money on softener.**
Who doesn't love to save money? With the additional steam treatment, your clothes will be extra soft and you won't even have to buy softener.
- 4. Less bacteria and allergens.**
Steam has a high temperature that ensures impurities are removed more efficiently. But because the fabric doesn't get soaked in hot water like it would in a regular high-temperature cycle, it's properties remain the same and it doesn't get damaged.
- 5. Refresh clothes.**
Sometimes your clothes are actually clean, but just need a bit of freshening up: for example a jacket after you've been to a busy restaurant. Special steam programmes can save you the trip to the dry cleaners' and refresh even your most sensitive garments in less than 30 minutes with no additional chemicals.

ExtraHygiene program

Removes up to 99,9 % of bacteria from your clothes

ExtraHygiene, steam washing program removes up to 99,9 % of bacteria and yeasts from your laundry with the help of steam and high-temperature washing. Clothes will be perfectly clean and at the same time your washing machine will be clean for a longer time, without microbial coatings and related unpleasant odors.

ShirtsSteam

Less time ironing shirts

The **ShirtsSteam** programme is tailor-made specifically for washing shirts to ensure they are not only thoroughly clean but also notably less creased, so you won't have to waste too much time ironing them.

CottonSteam

Steam treatment for cotton

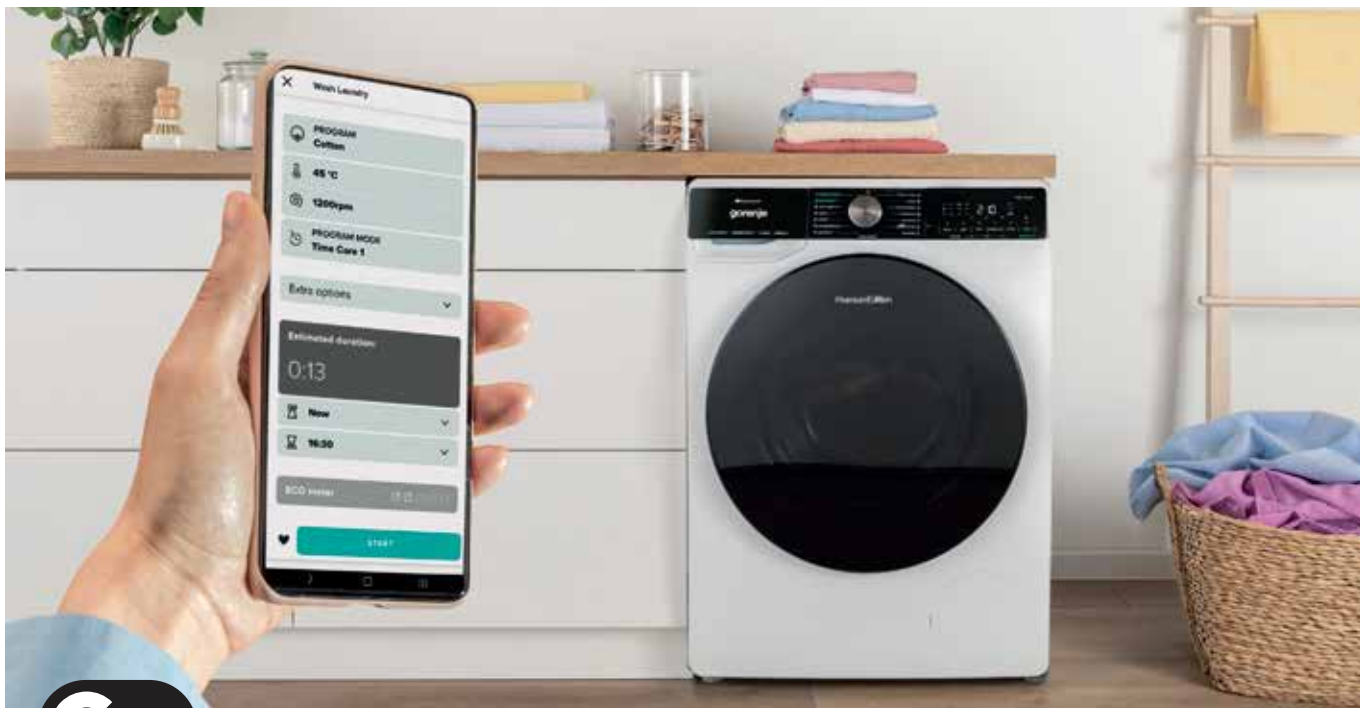

The **CottonSteam** programme was developed specifically for treating cotton garments, that can handle higher temperatures and spin speeds.

MixSteam

Gentle treatment for various materials

If you usually wash mixed loads, where you combine garments from various materials, including synthetics, the **MixSteam** is just the right choice for you. With a lower temperature and spin speed it will take gentle care of your favourite items.

ConnectLife

All about your washing machine at your fingertips

Simplify your life and have all the possibilities to control and check your washing machine via app on your mobile device. Remote control, mobile notifications and ticketing are functionalities that will help you manage all washing machine operations smoother and faster from wherever you are."

FastWashing function

Each wash program is now faster than ever

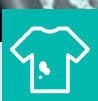

Are you in a constant rush, and have no time for anything? Gorenje Washing machines feature FastWashing function is designed just for that situation. This function gives you the opportunity to reduce time of washing. With this feature you can use a new function to reduce the wash time of each program, including pre-wash and additional water.

Anti-Crease function

Minimise crease in your clothes

If you can't take the laundry out of the washing machine right away don't worry, this feature will make sure your laundry doesn't get extra crumpled. Gorenje Washing machines feature called Anti-Crease function is designed to reduce creasing. Your drum will rotate for 2 hours to minimize creasing on the clothes after washing your clothes. You can stop this function anytime with pressing Start/stop button or on/off.

StainExpert

The most efficient stain care

Effective removal of stains no longer requires a high temperature or additional treatment of clothing before the wash. The perfect combination of temperature, time, and water will automatically remove up to 36 types of stubborn stains from 3 main groups: fruit (oranges, tomato sauce); organic stains (fat, butter, eggs, grass) and coffee (including tea, chocolate yoghurt, pasta, make-up).

PowerWash 59'32'

Your favourite items always ready to wear

You will need less than an hour to wash your clothes, thanks to this quick and intensive washing programme suitable for a half load.

AddClothes

Don't worry about forgotten laundry

With the AddClothes feature you can simply pause the washing cycle during its initial stages to add or remove laundry.

Simple Interface

Three steps and you are ready

The easy to use interface with centrally positioned selection knob allows you to start washing in just 3 easy steps; turn on the washing machine, select the programme and press start! Without any submenus for selecting extra functions and settings, but you do have the freedom to the settings on the large touch interface, so you can be sure your garments will be washed just as you like it.

Inverter PowerDrive motor

Powerful, yet silent motor

This quiet, but very efficient motor is designed to ensure a long life of your washing machine, saving energy with each cycle.

DoseAid

Optimal detergent dose for every load

DoseAid will always help you find the optimal dose of detergent, regardless of the amount of load you put in your washing machine, so you can rest assured you're using detergent in the most economical and healthy way.

MORE STEAM FOR LESS IRONING

WaveActive TUMBLE DRYERS

Gorenje **WaveActive** tumble dryers with **IonTech** technology not only efficiently remove allergens and unpleasant odours, but also significantly reduce creasing. Time-consuming hours of ironing are minimized, if not eliminated.

*So you can spend your time
on what's really important.*

NOW YOU CAN SAFELY DRY THE MOST SENSITIVE CLOTHES WITHOUT ANY RISKS

NatureDry

The best way for drying your laundry is of course drying in the pure nature on the fresh air and we have created a program that imitates just that. Special technology with additional sensor for temperature enables drying all kinds of laundry, even delicates and sports wear.

MINIMIZE
CREASING
MAXIMIZE
FRESHNESS

ConnectLife

All about your tumble dryer at your fingertips

Simplify your life and have all the possibilities to control and check your tumble dryer via app on your mobile device. Remote control, mobile notifications and ticketing are functionalities that will help you manage all tumble dryer operations smoother and faster from wherever you are."

HeatPump

Economical and gentle

Heat pump dryers boast high energy efficiency that enable great savings, and also dry more gently than conventional drying systems. The temperature in a heat pump dryer reaches around 50 °C, which allows drying almost all garments, while preventing overdrying and shrinking.

Condensation Class A

Eliminates problems of excess humidity when drying clothes

In each drying cycle **WaveActive** dryers condense an impressive 90 % of humidity from clothes, ensuring complete dryness of your laundry and eliminating any problems of excess humidity in your home. That means 55 l of water less per year will be released into your living space, compared to tumble dryers with B condensation efficiency class.

Inverter PowerDrive motor

Powerful, yet silent motor

This quiet, but very efficient motor is designed for a long life of your dryer, saving energy with each cycle.

Fast89'

Good drying result in just 89'. Faster than ever.

Are you in a constant rush with no time for anything? Gorenje Dryer Fast 89' feature is designed precisely with this in mind. This program significantly reduces drying time to brisk 89 minutes. This Gorenje dryer enables a perfect drying experience stress-free while saving your time.

TwinAir

Efficient drying of even the largest piles of laundry

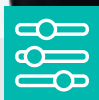

Even the largest pieces of laundry will be soft, evenly dried and less creased, straight from the dryer thanks to this patented bi-directional air blowing system.

Dryer modes

Perfect match for your needs

Our technology makes sure every type of fabric is dried in the best possible way by delivering the optimum combination of temperature, rotation and time. These settings can be further adapted with different drying modes, allowing you to find just the right combination for your current need.

SimpleInterface

Three steps and you are ready

The easy to use interface with centrally positioned selection knob allows you to start drying in just 3 easy steps; turn on the dryer, select the programme and press start! Without any submenus for selecting extra functions and settings, but you do have the freedom to the settings on the large touch interface, so you can be sure your garments will be dried just as you like it.

AntiCrease function

Anti-Crease system reduces creasing during drying; hence, less ironing is required.

Gorenje dryers feature an Anti-Crease system designed to reduce creasing. The tumble action and special 3D rib design prevent the garments from getting tangled or bundled up, which results in improved drying efficiency. A 10 minute period at the end of the drying cycle slowly cools down the laundry load to further reduce the possibility of creasing. Even when the dryer cannot be emptied immediately, your garments will not settle or crease by virtue of automatic, periodic tumbling of the load for a minimum of one hour after the cycle has finished.

'I EXPECT PERFECT HYGIENE' MOMENTS

Take the hygiene to the next level with modern dishwashers, assuring you always perfectly clean and dry dishes, thanks to innovative features.

Helping you keep your family safe and healthy.

FROM “CLEAN” TO ULTRA CLEAN

UltraClean DISHWASHERS

When it comes to the question of cleaning dishes, it is not about who or what is going to do it, but rather how it is going to be done. What looks clean is not necessarily clean, as eyes cannot detect the bacteria or virus. Gorenje new generation of UltraClean dishwashers ensure your family totally clean and perfectly dry dishes every time. Inside the elegant design they bring you high quality and high-hygiene performance with amazing new features that really simplify your everyday life. Spacious and flexible interiors, adjustable baskets or high-pressure water jets that effectively remove dirt, further contribute to the quality of the new Gorenje dishwashers.

Perfectly cleaned dishes ready to serve your next meal.

REMOVES 99.9% OF BACTERIA AND VIRUSES AT EVEN LOWER TEMPERATURE

ExtraHygiene with UV Technology

Real antibacterial effect also at lower programme temperatures (example Eco 55°C). The UV light function is activated via new UV option, which is carefully placed in the hydraulic system. UV function is optional and can be used on all programmes. With combination of Eco, Auto, Intensive, Daily, Night and Hygiene programme, it removes up to 99.9% of bacteria and viruses from the rinsing water.

IonTech

No more bad smells while waiting to fill-up your dishwasher

Everyone is familiar with bad smell that comes from a few days half loaded dishwasher that has been loading for a few days. The advanced IonTech technology built in Gorenje dishwashers operates on the principle of the natural process of ionization, which naturally eliminates odors and keeps your dishwasher fresh, even when it is full of dirty dishes.

SUPERB DRY DISHES

SmartUltra Dry

After the washing cycle, fan gets activated and removes all hot steam from the tub. The moisture is directed back to the tub. The dishwasher door automatically opens just slightly to let in fresh air, resulting in effective protection of the kitchen counter from hot steam outlet.

This allows fresh air to reach the dishes, so the washed items like plastic dishes dry completely.

TotalDry

Perfect dry dishes

Excellent for quick drying with low energy consumption. After the washing cycle, the dishwasher door automatically opens just slightly to let out the excess steam. This allows fresh air to reach the tableware, so the washed items like plastic dishes dry completely.

UltraClean cutlery basket

Ultimate flexibility for your cutlery

SmartFlex cutlery baskets affords ultimate flexibility when washing cutlery. Depending on your needs, you can use the full cutlery basket or divide it into two separate parts, that can be placed in different positions in the bottom dishwasher basket. This way, you will be able to fit as much dishes, pots and pans into the dishwasher as possible.

AUTO
programmes

AutoProgramme

Party for two or twelve – the dishes will be spotlessly clean

Sometimes all you need is to give the glassware a light rinse, on other occasions your dishwasher is full of heavy dishes with left overs from Sunday lunch. The advanced sensor technology will always adjust your dishwashing programme to clean dishes perfectly with optimized water and energy consumption.

FastEfficient in 1h

Effectively fast

An effective and fast programme designed for daily use on dishes with slightly dried leftovers. This program works at 65°C and it is finished in 1 hour.

15 min SpeedWash

Clean fast so you can slow down

Imagine throwing a dinner party and the dishes from the main course are cleaned in the time it takes to serve dessert. When you select the one hour programme together with the SpeedWash function, Gorenje dishwashers will do your dishes in only 15 minutes. Perfect for handling the volume of dishes created by having multiple guests in the house.

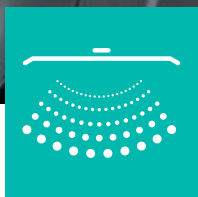

StartDelay

Clean dishes, lower electricity bill

Program to start the dishwashing process later and let the dishwasher work whenever it is most convenient, for example when electricity is cheaper. The dishes will be perfectly washed right when you need them.

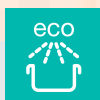

UP TO 30% BETTER CLEANING RESULTS

30 %
BETTER
RESULT

Top SprayArm

The additional spray arm, located at the top of the dishwasher, ensures better water coverage and thorough rinsing for up to 30 % better cleaning results. All dishes and cutlery will always be washed to perfection.

EcoProgramme

Saving energy

When you select the ECO programme, your appliance will use lower wash and rinse temperatures and minimise the amount of water required while still achieving effective dirt removal.

Night Programme

Quiet washing at only 37 dB

With Night programme the new Gorenje dishwasher is 2 dB less noisy than the standard programme. Your dishes will be clean in the morning and your sleep will remain undisturbed.

**LOAD &
FORGET!**

**AS FLEXIBLE
AS YOUR
TIME WILL BE**

16 place settings

Gorenje UltraClean dishwashers offer enough space for all your needs. Three baskets enable washing up to 16 place settings at a time. The fully flexible interior allows for different loading options, the use is simple and you can really throw the ultimate party!

MultiClack

Adjusted to every single pot

The truly simple two level basket adjustment system allows you to fit even the biggest pots and plates. It makes your dishwasher's interior completely adjustable to your current needs.

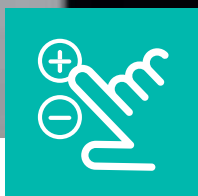

Adjustable baskets

Carefully designed interior

The baskets are equipped with highlighted movable elements and a customizable basket layout for easy loading. The truly simple two level basket adjustment system allows you to fit even the biggest pots and plates. The plate rack in the lower basket can be easily folded. Cutlery can be perfectly organized on a special tray, where they are positioned separately for perfect cleaning and drying results. Every detail is carefully designed for easiest possible handling.

JUST ONE TOUCH IS ENOUGH

SmartControl

Navigating your dishwasher has never been easier! All the controls are located at an ergonomic position with a straightforward left-to-right logic of operation. While all models excel with the white LED display and all are also enriched with touch control. Just one touch is enough to start the dishwashing process.

DetergentDispenser

Minimalistic sliding detergent dispenser

The new Gorenje dishwashing appliances are fitted with a minimalistic sliding detergent dispenser from where the pod pops out silently. The functionality of easy-to-clean dispenser makes better detergent dosage and wash all types of dishes.

SmartDosing

Stay without dosing up to one month

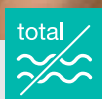

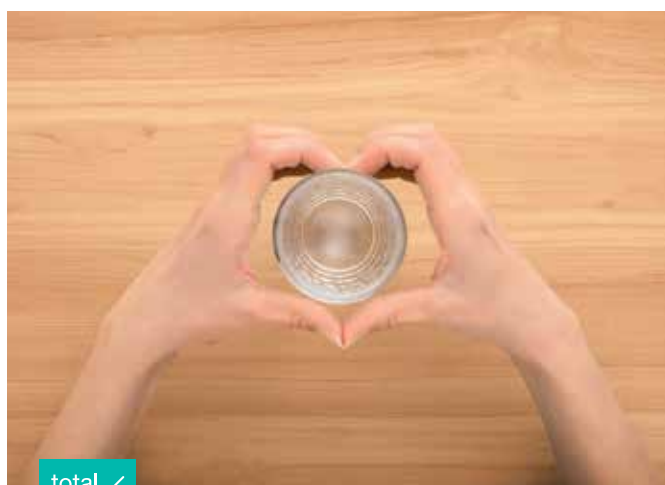

This unique SmartDosing solution saves you time, detergent and energy! Simply pour the detergent in the container and stay without dosing up to one month, which is in average 20 washing cycles. Based on the programme you select, the dishwasher will automatically release the right amount of detergent. The container is removable and easy to clean.

Intensive CleanZone

Perfect solution for toughest stains and highest level of dirtiness

The new Gorenje dishwashing models have the perfect solution for toughest stains and highest level of dirtiness: two powerful and high efficient nozzles, located in the rear part of the tub. With application of high pressure water, they are targeting directly the hardest stains, perfect for cleaning pots, pans and baking trays.

Total AquaStop

Do not worry about water spillage

With the AquaStop safety feature, the dishwasher can be safely left to operate at night as well as in your absence. In case of a leakage or flooding, AquaStop automatically cuts off the water supply while the pump drains the water out of the dishwasher tub. AquaStop remains fully functional over the lifetime of the appliance.

SuperSilent

No louder than a whisper

The best Gorenje UltraClean dishwashers operate at noise level which is equivalent to a whispered conversation between two people. The silent operation comes as a result of special sound insulation, efficient motors, high-quality materials and innovative solutions of the dishwashing system.

'THE MASTERCHEF AT HOME' MOMENTS

Perfect cooking and baking are truly simpler than ever before. Enjoy in innovative, easy-to-use, effective, and energy-saving cookers, tailored to your needs.

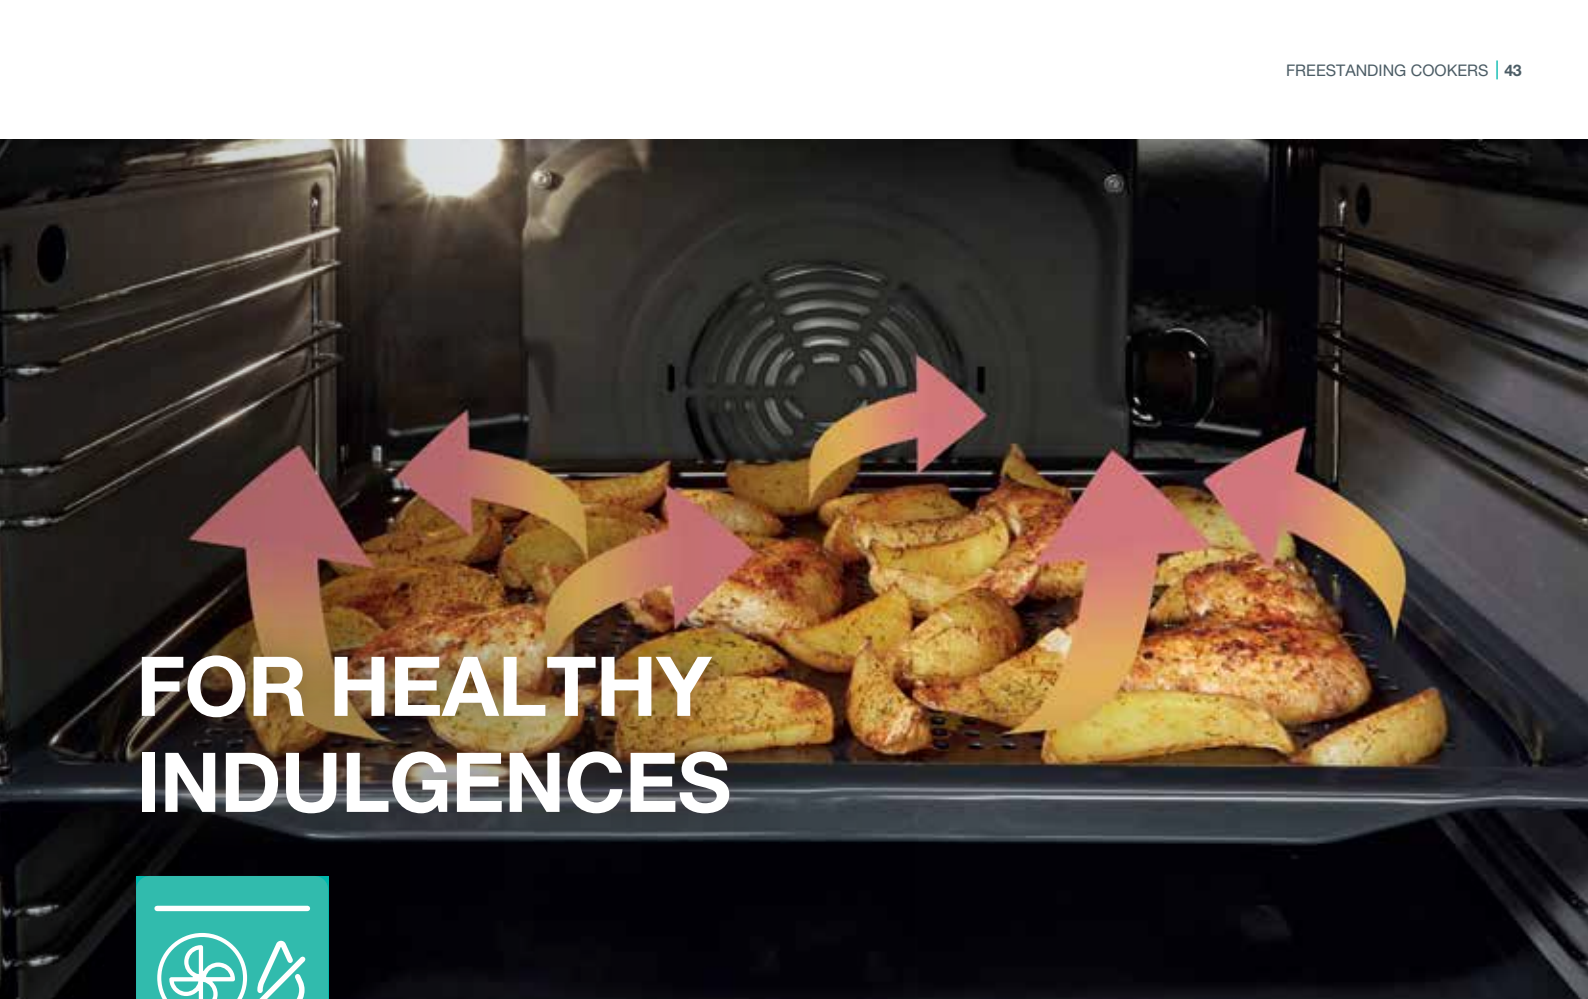

A CENTERPIECE OF EVERY KITCHEN

MODERN FREESTANDING COOKERS

Imagine cooking becoming a stress-free fun activity. With the new cookers, completely adapted to you and your preferences, it is. By enabling you to cook and bake at once, you not only save time and space, but can also get creative using innovative technologies, that inspire you with smart functions and features, helping you in preparing healthy, tasty meals for your family and friends. Just like a master chef!

Make it crispy or tender, always perfect.

FOR HEALTHY INDULGENCES

AirFry

Now you can have the crispiness and tastiness of fried food without the extra calories. This method of extremely intensive baking with hot air doesn't require any fat to ensure that perfectly delicious crunchy golden crust. In combination with special perforated baking tray, (depending on the model), that perfectly encapsulate the dish all around, you will achieve even better results. Suitable for small cuts of meat, fish, vegetables and pre-prepared frozen products, like French fries and chicken nuggets.

HomeMade shape

Evenly baked every time

Gorenje cooker ovens are well known for their innovative rounded cavity, which has been their distinctive feature for many years. The HomeMade shape was inspired by the traditional wood burning ovens and ensures better circulation of air compared to competitors.

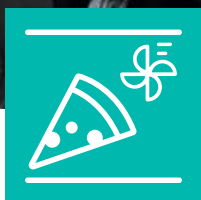

Now, the HomeMade shape has been completely revamped and the airflow perfected due to a new heater design and the improved distribution of the ventilation openings. That is why the temperature is stable throughout the cooker oven. Never again will your dishes be burnt on one side and underdone on the other.

**MIMICS
TRADITIONAL
OVENS**

BEST PIZZA IN TOWN

300 °C

Pizza function

This program with setting of baking temperature up to 300 °C was specifically designed to help you bake the perfect pizza, focaccia, flatbread and similar baked delicacies.

SuperSize

**EVENLY
BAKED**

Ready for XXL recipes

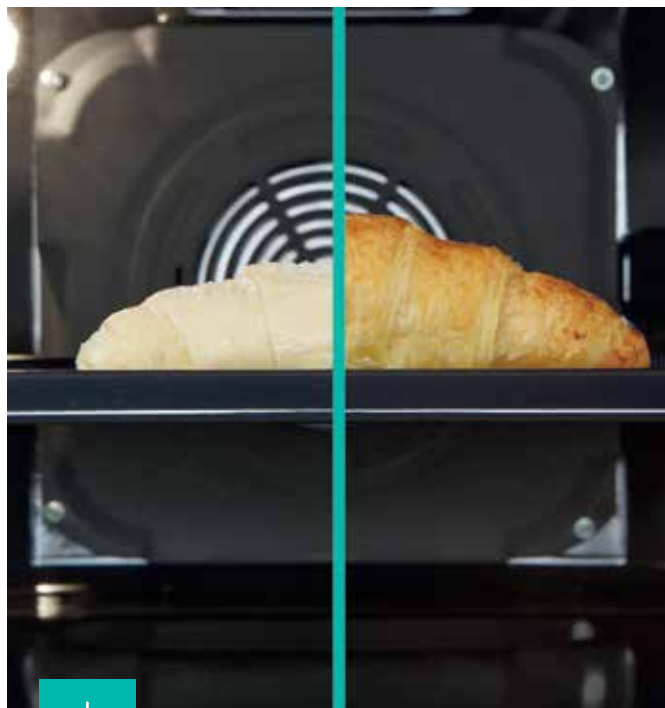

Gorenje cookers offer enlarged baking surface and use of extra big trays. Innovative solutions enable optimised energy consumption and evenly cooked food, regardless of the quantity. Full oven width is efficiently used while superior technology makes sure the food is evenly done on all levels.

GentleClose

A soft touch is enough

Only a soft touch is needed to close the oven door smoothly, without any noise.

FrozenBake

The fastest way to bake frozen goodies

This efficient baking program is the perfect choice for all frozen food and pre-prepared meals.

OpenView

Excellent overview of the baking process

Advanced and even double lighting featured in some models of cookers enable clear view of the large oven cavity. Combined with special design of the glass door, this brings excellent overview of the baking process.

MultiAir Technology

Perfect from all sides

MultiAir technology guarantees the optimal circulation of heat within the oven. Due to smartly positioned ventilation openings on the back wall and the unique rounded shape, air is spread evenly throughout the oven. The fan pushes hot air around the entire oven volume, making the food perfectly baked on all sides. The dynamic air movement also allows simultaneous baking on multiple levels without smells and flavours mixing together.

**DYNAMIC
AIR
MOVEMENT**

STEAM

ExtraSteam

The simpler way to bake with steam

This program creates the perfectly steamed environment that ensures your bread will have a high rise and crunchy crust. All you have to do is put some water into a shallow tray, select the ExtraSteam program and let the oven do the work.

Closed door grilling

Keep the heat right where you need it

Innovative special construction of the chimney in new Gorenje cookers brings you all the benefits of closed door grilling. Faster, safer and more efficient way to perfectly grilled food, while the knobs and cooker surroundings stay nicely cool.

PerfectGrill

A double heater for evenly crispy food

The best baking results are achieved with a combination of larger and smaller heaters, where the latter is positioned inside the larger one. The smart positioning of the heaters allows optimal heat distribution and provides the ultimate baking results every time, so food is crispy on the outside and soft on the inside.

FastPreheat

For last minute inspiration

OptiBake cooker ovens reach a temperature of up to 200 °C in just 4.50 minutes, saving 30 % of the time needed by standard preheating and making them one of the fastest ovens on the market.

This is very convenient for recipes that require a preheated cooker oven. A light and sound signal informs you when the temperature is just right.

MultiLevel Baking

When you want to make it all

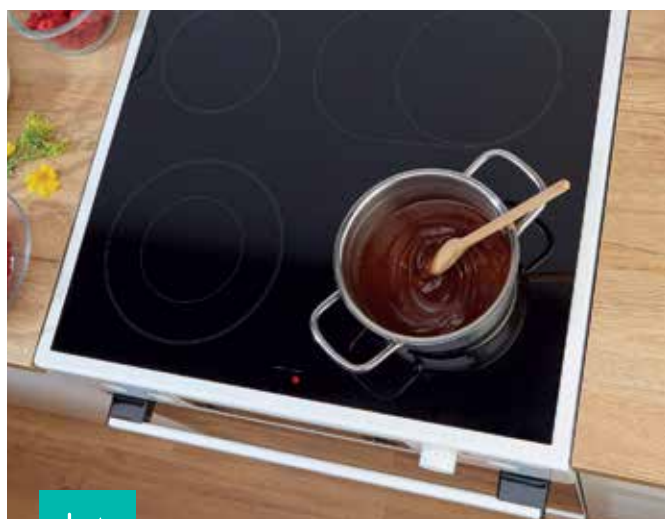

Combination of smart air movement, evenly distributed spaces between the tray positions and special slightly rounded cavity ensure the food is evenly baked on every level and since the oven volume is larger, the overview is excellent as well.

VARIETY OF HEATERS FOR BEST COOKING RESULTS

Hi-Light cooktop

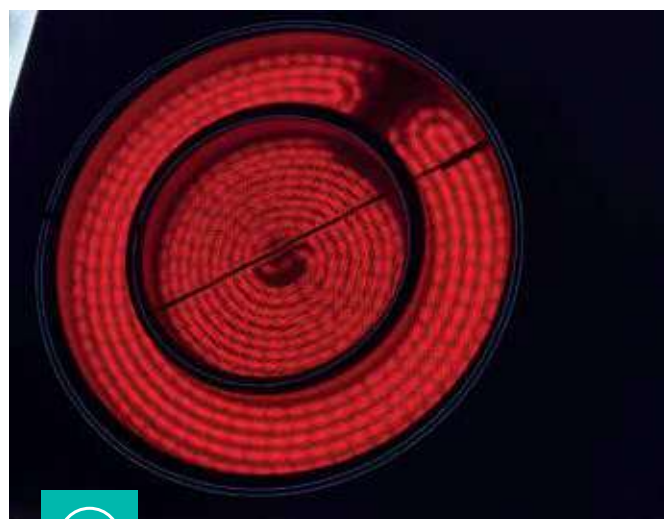

Gorenje hi-light cooktops are designed as an easy-to-use tool that enables everyone to cook with great results. Efficient and smart, hi-light hobs are equipped with features that make cooking effortless. They offer double or oval cooking zones for best fit to your needs. With special features like residual heat indicators, timer and smart control they provide perfect control of the process and bring maximum safety.

SoftMelt

One, two, chocolate

The SoftMelt function gently melts chocolate or butter at a constant temperature of 42°C, thereby creating perfect conditions for melting, without burning. This function can also be used for gentle defrosting.

Dual ring cooking zone

Expanding the cooking zone

In addition to three conventional hi-light heaters, the hi-light glass ceramic hob also features a heater with a double circular surface that can adapt to pots and pans of varying sizes.

PERFECT TASTE WITH SPARK OF CREATIVITY

Gas Cooktop

Cooking like a chef can be simple. All it takes is a creative spark as Gorenje cooker with gas cooktop will take care of everything else. BigSurface, powerful ChefBurners and other advanced features offer support for your wildest cooking endeavours. Ignite your inspiration and surprise your loved ones with perfect home-made dishes.

WokBurner

Powerful cooking, great authentic taste

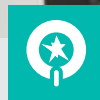

New wok burner with special shape of gas crown directs flame directly to wok and enables even more powerful cooking with up to 4.0 kW power. Asian cuisine, vegetables and other dishes have never been so crisp and delicious, yet done so quickly.

Cast iron ProGrids

Strong, stable and durable support

Massive and elegant cast iron ProGrids are extremely stable and resistant even to the highest temperatures. They bring superior stability, durability and user-friendly design to your kitchen.

One hand ignition

Simple and convenient

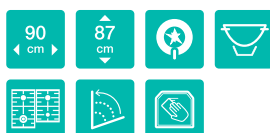

One-hand burner ignition brings extra comfort and easy control to your cooker with gas cooktop. To activate the gas burner simply press the knob down and rotate it to desired level with one hand while your other hand is free. Quick, simple, and efficient.

- Left rear: Ø 7,4 cm, 1,9 kW
- Right rear: Ø 7,4 cm, 1,9 kW
- Type of pan support: Enameled

- Gas oven - 60 l

- Interior light: Illumination // Closed door grilling

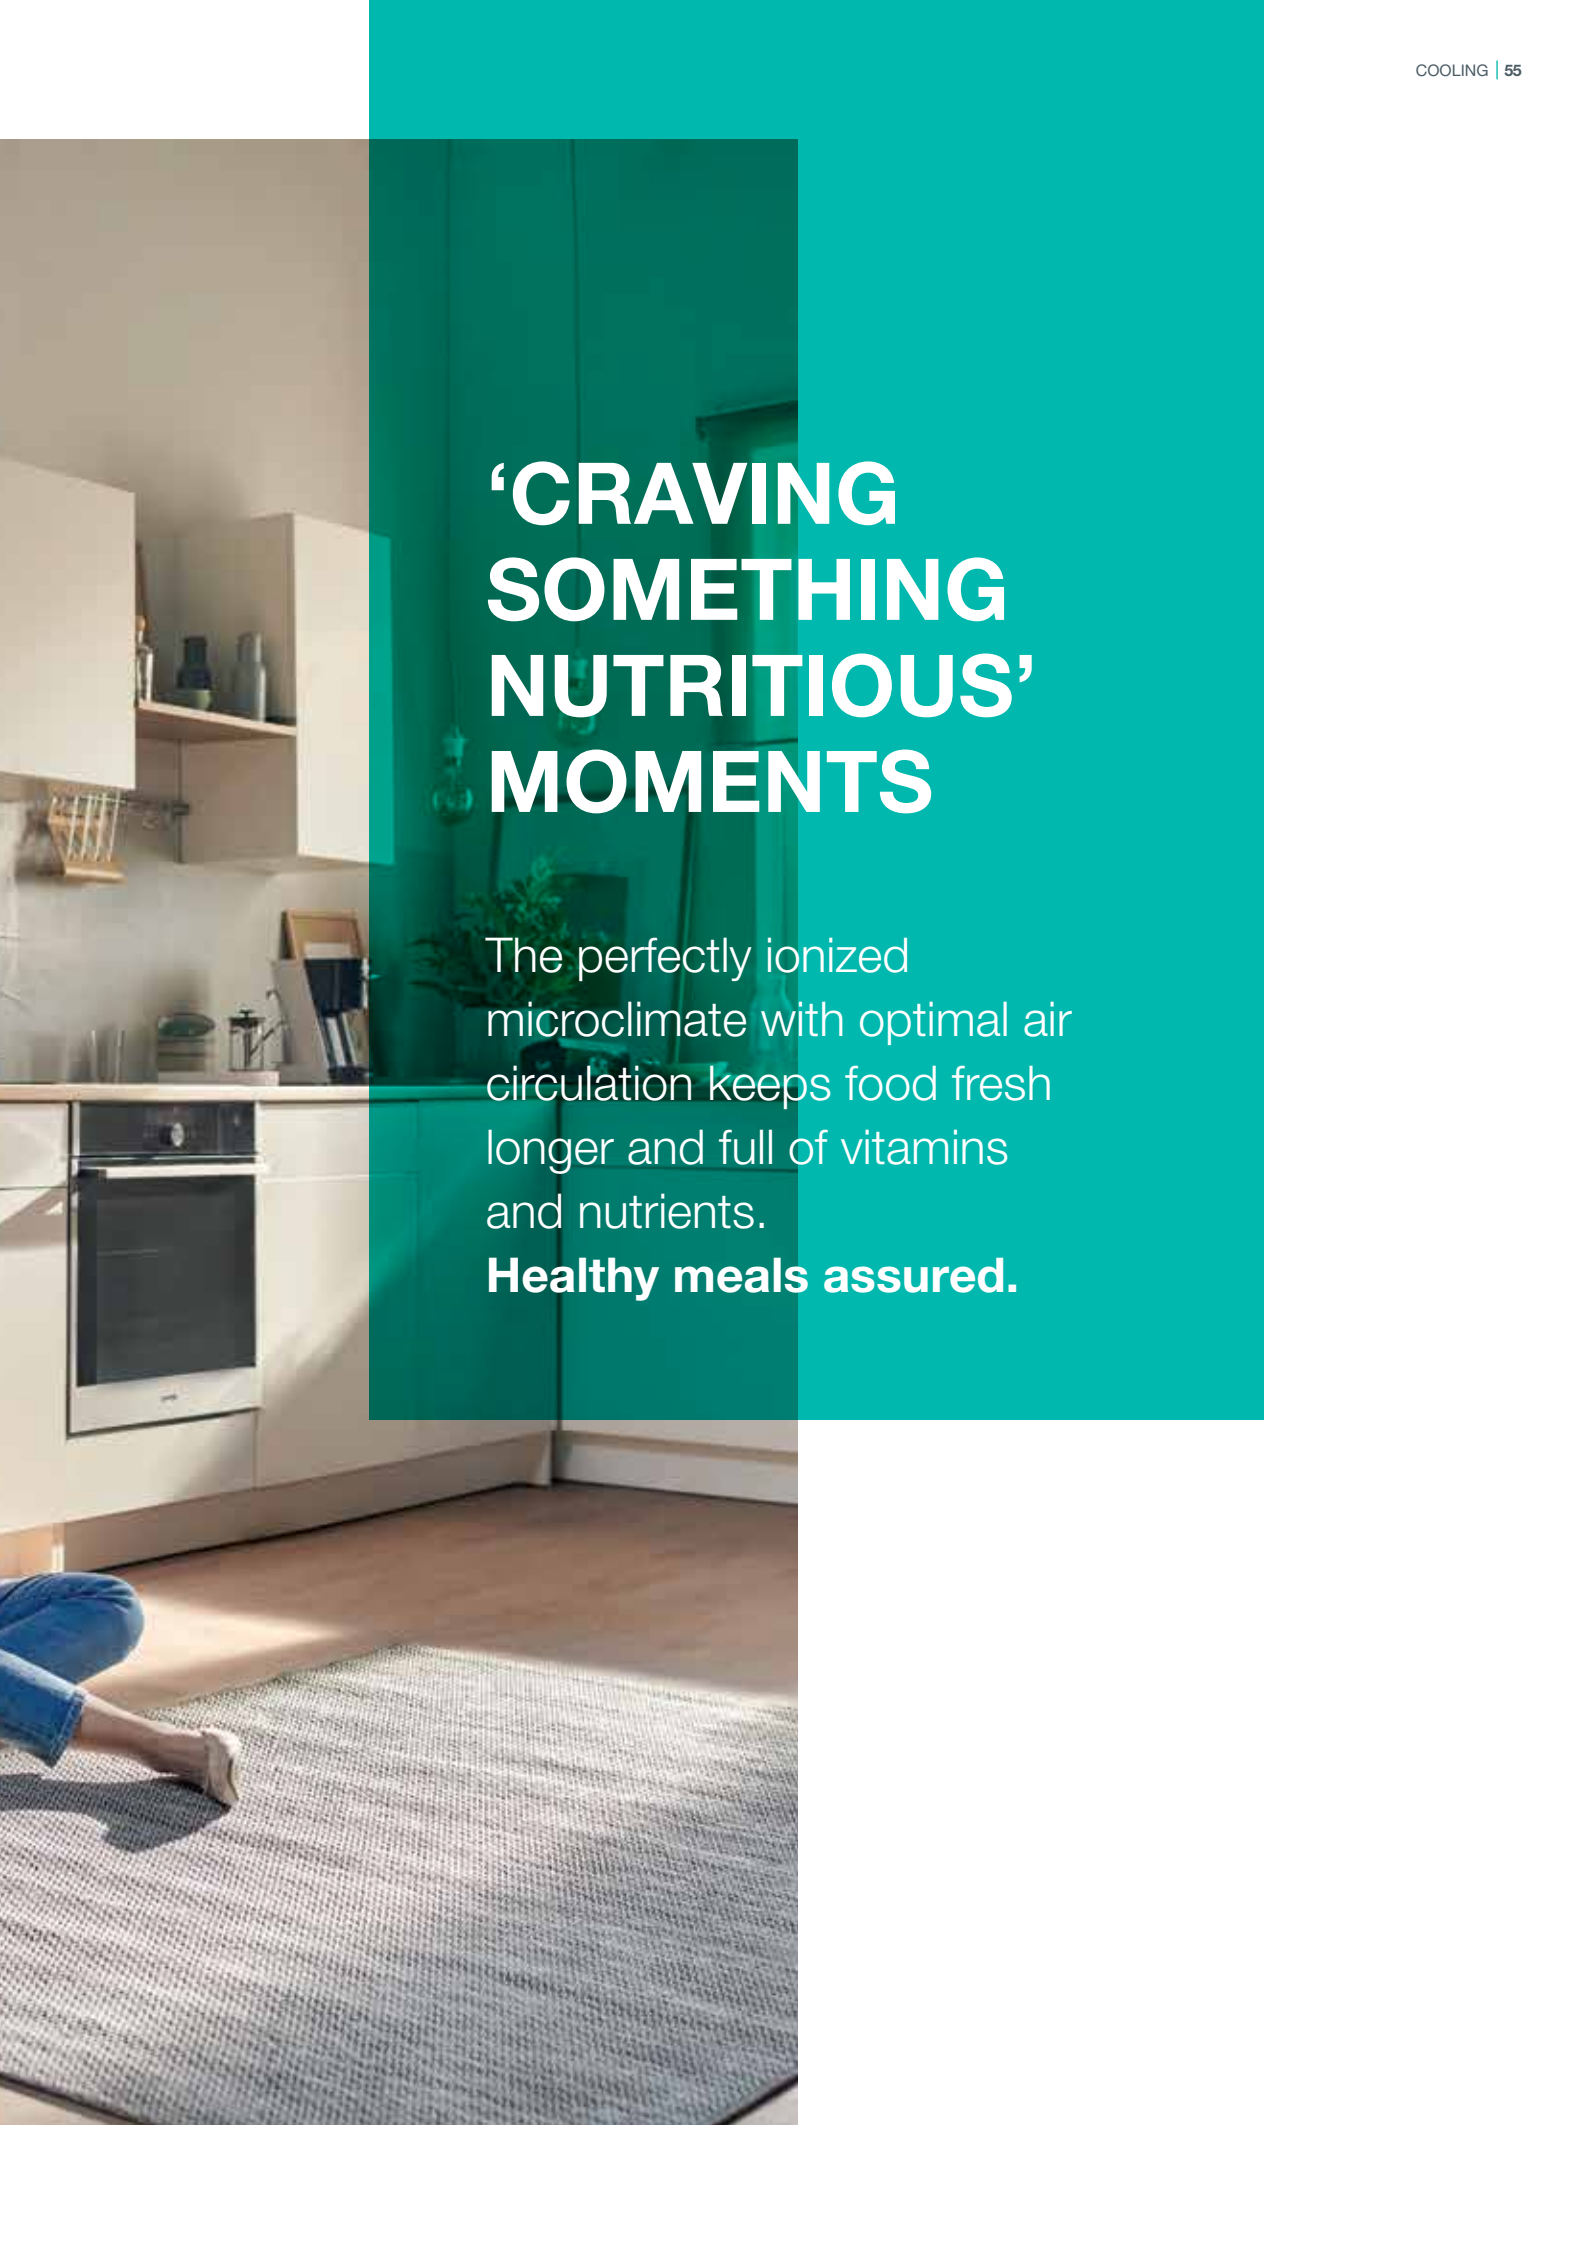

- 1 shallow enameled baking pan // 1 Deep tray
- 1 Premium grill rack // Motorized turn spit
- Drawn guides

- Thermoelectric fuse
- Double glazed oven door with one heat deflector (CompactDoor) // Gas thermostat // Gas control

- SilverMatte // Removable flat oven inner door glass surface

- Connected load: **32 W**
- Energy consumption: **1,64 kWh** (conventional)
- Product dimensions (HxWxD): **85 x 60 x 60 cm**

'CRAVING SOMETHING NUTRITIOUS' MOMENTS

The perfectly ionized microclimate with optimal air circulation keeps food fresh longer and full of vitamins and nutrients.

Healthy meals assured.

FRESH – NO MATTER WHAT

IonGeneration FRIDGE FREEZERS

Gorenje fridge freezers are designed for maximum freshness. Their **IonAir** with **MultiFlow 360°** technology continuously refreshes the air to simulate the natural microclimate and provide perfect storage conditions. With smart, user-friendly functions they seamlessly adapt to your lifestyle. No matter how often you open the fridge door, **AdaptTech** maintains the optimal temperature and keeps your food in perfect shape, while the **NoFrost Plus** cooling system prevents the accumulation of frost and eliminates defrosting.

Keeps your food healthy and tasty.

YOUR FOOD STAYS FRESH FOR LONGER WHILE SAVING ENERGY

With **AdaptTech**

Without **AdaptTech**

AdaptTech

The late-night trip to the fridge. You find the cake and start your internal monologue - with the fridge door open. The temperature suddenly rises and causes a thermal shock. This causes the food to spoil sooner. Thankfully, our **AdaptTech** technology continuously monitors and learns your habits. So, it can predict your trips to the fridge and decrease the temperature by 1 or 2 °C so your food stays fresh and full of nutrients.

Inverter Compressor

Steady, silent, and durable

Compared to a conventional compressor, inverter compressors adapt better and faster to any changes in the fridge temperature, making them more efficient and economical. They also have a longer useful life and a lower noise level.

storage space
in just **2 hours**

THERE'S NO BETTER SOLUTION WHEN YOU URGENTLY NEED MORE FRIDGE SPACE

ConvertActive

It's my party and I'll do what I want to - yes, even turn the freezer into a fridge! Imagine you've got a big party planned, but not enough space to cool the drinks... No sweat! Our **ConvertActive** technology lets you turn the freezer compartment into a refrigerator compartment or large **ZeroZone** drawer simply by pressing a button.

SensoTech

Advanced control via LED display

Advanced control via LED display allows accurate settings of temperature in the refrigerator and the freezer compartment from the Superior line. Features like **XtremeFreeze**, **FastFreeze**, **SuperCool**, and **EcoMode** can be switched on by a gentle touch of the relevant symbol. A special signal light and an audible signal warn the user of a sudden increase of the temperature in the appliance.

CrispZone with
HumidityControl

**CRISPY
VEGGIES
& FRUITS**

Just like garden-fresh

CrispZone is one of the largest fruit and vegetables bins in the market. Low temperature and the option to adjust the humidity extend the freshness of your produce.

FreshZone drawer

Fresh as if straight from nature

The drawer with the lowest temperature in the refrigerator is ideal for storing meat, fish, fruit, and vegetables. It will preserve the food's freshness, aroma, colour, and flavour for much longer.

SuperCool

Rapid cooling after weekly shopping

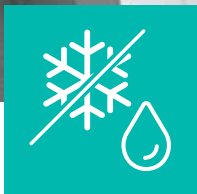

The intensive cooling function drops the refrigerator temperature to 3 °C, which is lower than usual by nearly a half. Combined with large refrigerator compartment volume, this temperature is ideal for rapid cooling of food after major shopping trips. After six hours, the function is switched off automatically and the refrigerator compartment temperature returns to the initial setting.

SimpleSlide shelves

For both tall and short bottles

Height-adjustable shelves in the refrigerator door can be easily moved up or down to accommodate up to 5 kilograms of food of different shapes or sizes.

NoFrost Plus

One of the best cooling systems in the market, installed in the freezer compartment, prevents the accumulation of ice and frost to keep the power consumption low, while in the refrigerator compartment, it maintains an ideal microclimate for fresh food. Circulation of ionized air prevents the food from drying out and retains its vitamins and minerals.

XXL SpaceBox

Enough space to store a turkey

This freezer compartment drawer is the largest in the appliance and it is ideal for storing large items like a turkey, several pizzas, or even cakes.

XtremeFreeze

Best nutrients preservation

When this function is activated, the food placed in a special drawer in the freezer compartment will be frozen in half the usual time. Rapid freezing at extremely low temperatures below -30°C leads to formation of microcrystals that, unlike in case of slow freezing, do not damage the cellular structure of the food. The shock-approach to freezing thus preserves all nutrients and the flavour of the food. After approximately 1 day, the function is automatically switched off and the temperature in the drawer returns to the initial setting.

FastFreeze

Rapid freezing

The FastFreeze function freezes the food at -24°C to preserve most of the minerals in the food. After approximately 2 days, the function is switched off automatically and the freezer compartment temperature returns to the initial setting. And in case you forget, smart sensors make sure the function is switched on at the right time.

A PLACE FOR EVERYTHING

SIDE BY SIDE FRIDGE FREEZERS

Side by side fridge freezers are the ultimate choice for anyone who wants a convenient and efficient way to preserve the freshness of their food. Combining modern design with powerful technology and a spacious interior, these appliances offer easily accessible and well-organized storage for all your groceries. Due to their larger volume they ensure less shopping trips and even help reduce food waste thanks to a better overview of the stored items. It's no wonder, that you will fall in love with them instantly.

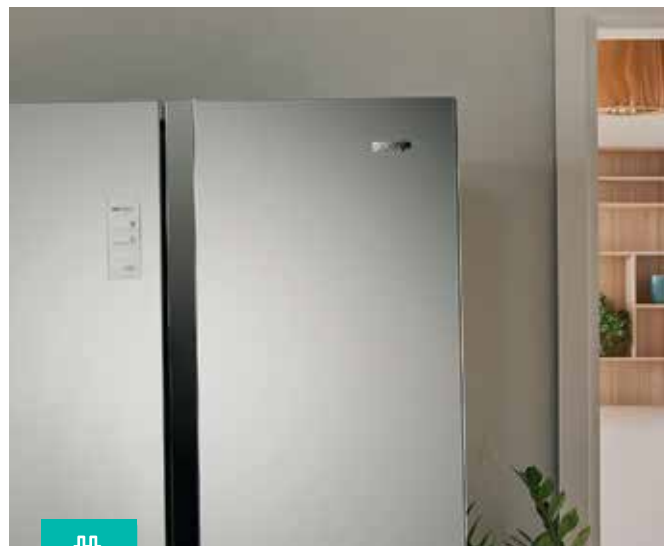

Well organized space for perfect overview.

TwistIce

Ice whenever you need it

There's always enough ice in the freezer with the **TwistIce** removable internal ice maker. Simply twist the handle and enjoy a chilled drink.

InverterCompressor

Steady, silent, and durable

Inverter compressors are quieter, more durable and consume less energy as compared to a conventional compressor. They adapt better and faster to temperature changes inside the refrigerator, for example when the door is opened, which means less temperature fluctuations and better storage conditions for your food.

XtraSpace

Practical and spacious

Efficiently designed interior offers enough space for larger quantities of food, saving you the frequent shopping trips. The food can be easily organized on glass shelves, in large drawers, or the bins on the inner wall of the door, meaning you can always see what's available and waste less.

LedLight

Well-arranged and efficient

LED lighting in refrigerators provides excellent and highly efficient illumination as it has a much longer useful life and uses significantly less power than conventional light bulbs.
